

## STATEMENT OF PURPOSE

I, Syed Al Faruque Nawaz, Bachelor of Technology degree in Electronics and Communication Engineering, I look forward to pursue post graduate study to receive formal education and refine my knowledge and skills in the area of Information Technology in which I have worked for seven years. I believe it will also serve to give direction to my goal of a career as a research professional at an academic or commercial, research-oriented organization. I intend to pursue an MSC degree in order to reach that goal.

In my undergraduate studies, I have benefited from the breadth of Regional Engineering College Kurukshetra's syllabi content that has given me an exposure to the core areas of Computer Science and a strong conceptual understanding of the same. In these four years of study, I have strived to maintain an approach of expending independent effort in all my endeavors. Learning by my own and sharing my knowledge with others has been most worthwhile, when comprehending a concept.

Over the past seven years of my work experience with Tata Consultancy Services, I have developed an interest in the areas of Database Management and Design. I have worked with many real time databases of some of the top rated companies in Fortune 500 list and involved in designing and maintaining large databases, Front ends and Data warehouses. The work involved in maintaining these systems have led me to appreciate the intricacies involved in this field. However, for my MSC degree, I remain open to other topics as well.

One person's life influences the lives of an unbelievable number of people, one of the most important lessons I learned being a Project Leader in my last company, hence the need of responsible actions. It taught me that the basis of good work is self-reliance and very importantly, time management. Not all of my entire seven years were devoid of shortcomings. I learned to accept both criticism and praise with a positive frame of mind. My work has brought me the opportunity to work and interact with various kinds of people all around the globe. This was a distinctively gratifying experience for me, which I feel would stand in good stead in the future.

In conclusion, I would like to add that the essence of University education lies in the synergetic relationship between the student and his department. I feel that higher studies at Teesside University will be the most logical extension of my academic pursuits and a major step towards achieving my objectives.

(Syed Al Faruque Nawaz)
