

Statement of Purpose

I Gurmeetsingh Jaswindersingh Ghotra come from Nagpur, a city in the state of Maharashtra, and is the largest city in the central India, I firmly believe education plays a very important role in a person's life. It helps the individual to put his potentials to optimal use which is self-evident. Without education, the training of the human minds is incomplete. No individual is a human being in the working world until he has been educated in the proper sense.

I am very cheerful and curious boy, and have always dreamt big, I completed my 10th from Guru Nanak High School Nagpur and 12th in Science from Dr Ambedkar College Nagpur. I always focused to be an Engineer right from my childhood. An enormous number of challenges, thrown out by rapid development in the field of Science and Technology have made me choose engineering profession.

Hence I have taken this opportunity to take a step towards my career and secured admission at Glyndwr University to pursue my Bachelors in Aeronautical and Mechanical Engineering in September 2010 intake. I believe to study in United Kingdom would be the greatest achievement for me which will give me very good international knowledge, real time global exposure and would be an asset for me to invest in my work.

On completing my studies I would like to come back to India, as India has lots of opportunity open for Engineers.

(Gurmeetsingh Ghotra)
